

Virtual Learning, Sample Schedule and Tips for Families

Although school buildings will be closed as we start the 2020-21 school year, teaching and learning are continuing. This post outlines what virtual learning looks like for your student in Elma High School.

You may have notices that the new virtual environment is much different than what we were able to offer in the spring of 2020. Here are some of the changes:

- A standard curriculum will be used across all subject areas.
- Students' work will be graded, and attendance will be taken.
- Students generally will spend 1 to 2.5 hours a day watching learning videos created by their teachers, and .5 to 2.5 hours a day working with their teachers on zoom sessions.
- Teachers and staff will have clearly defined roles and expectations and will check in on students on a regular basis, and you may have noticed that the first few days of school was devoted to easing everyone into the virtual learning environment.
- At this time the expectation is that all students are engaged in the learning activities.

School Commitments

During virtual learning, families can expect that schools and teachers will:

- Make sure each student has a laptop or other device.
- Provide a daily mix of recorded and in person, interactive classes
- Give students regular feedback on their work.
- Have zoom hours each day so students who need extra help from their teachers can get it.
- Be accessible by email.
- Provide social-emotional learning supports to all students.
- Meet the needs of diverse learners and ensure we provide accommodations, modifications, access, and equity for all students.

What Families Can Do

This school year will present unique challenges to students, parents, and teachers. Elma High School does not expect parents to become educators, but there are some things parents can do to maximize students' productivity while they are learning virtually at home:

- Create a daily routine and ensure children have a quiet, dedicated space to do their work.
- Ask questions about what your children are learning.
- Make sure they are getting breaks and getting outside when they can.
- Make sure they're getting adequate sleep and are well-rested when they start learning each day.
- Encourage them.
- Be patient and flexible.

Sample student Schedules

Each day during virtual learning, students will have a mix of live classes with teachers

- The sample high school schedules show the live classes in yellow to give students and families an idea of what a typical day and week will look like.
- The Schedule below is only a sample schedule as an example of what you might do.
 - If this schedule does not work for you create your own and stick with it.

Time	Monday	Tuesday	Wednesday	Thursday	Friday
8:00-8:30 (Watch Video) 8:30-9:00 (Complete assignment, write down questions)	ELA	Math	ELA	Math	SEL Work completion OdysseyWare
